PERSONAL NOTE

I am an engineer and researcher fascinated by how complex systems stay in sync from autonomous drones to global platforms. Approaching technical challenges with a calligrapher's eye for detail, I bridge the gap between elegant design and functional strategy. With a Computer Science background from JNU, I use technical rigor and creative curiosity to solve real-world friction and analyze the market impact of emerging technologies

EDUCATION

Jawaharlal Nehru University <i>B.Tech in Computer Science and Engineering; CGPA: 8.8/10</i>	New Delhi, India 2023 – Present
M.R.R Arya Sen. Sec. School <i>CBSE Class XII: 95.4%</i>	Haryana, India 2023
M.R.R Arya Sen. Sec. School <i>CBSE Class X: 96.4%</i>	Haryana, India 2021

EXPERIENCE

Placement Cell, Jawaharlal Nehru University <i>Web Development Executive</i>	New Delhi, India Aug 2025 – Present
- Designed and prototyped placement portal web pages using Figma, focusing on clean layout and intuitive user flow. - Converted design mockups into responsive webpages using HTML, CSS, and basic JavaScript. - Worked on improving visual consistency and accessibility across multiple student-facing pages. - Collaborated with team members to update content and maintain placement-related web resources.	

PROJECTS

NexusCart (AI-Powered E-commerce Engine) <i>React, Node.js, Groq, Supabase, APIs</i> [GitHub] [Live]	Feb 2026
- Developed a middleware tool that automates the transition from Shopify product listings to WordPress sites and blogs, using Groq (Llama 3) to turn raw JSON data into SEO-optimized content. - Built a media pipeline to sync Shopify images with the WordPress Media Library, ensuring automated blog posts and product pages are published with high-resolution featured images. - Created a central dashboard to monitor sync status and publishing logs, using Supabase to manage the data flow between platforms in real-time.	
Deep Research Agent <i>Python, Streamlit, Ollama, Groq, REST APIs</i> [GitHub] [Live]	Feb 2026
- Created an AI research tool that lets users toggle between local (Ollama) and cloud (Groq) models based on their performance or privacy needs. - Automated the research process by fetching data from Wikipedia and generating structured reports (Introduction to Conclusion) through targeted prompt engineering. - Designed a simple Streamlit interface with session-based history, making complex AI research accessible through a browser.	
https://hospital-manager-nine.vercel.app/	
Hospital Management System <i>PHP, MySQL, JavaScript</i> [GitHub] [Live]	Oct 2024
- Built a full-stack application using PHP to manage patient records, doctor scheduling, and automated billing across three distinct user roles. - Designed a structured MySQL database to replace manual paperwork, improving data retrieval speed and record accuracy. - Implemented a clean, responsive front-end to ensure the system remained usable on both desktop and tablet devices in a clinic setting.	

TECHNICAL SKILLS

Web Development: HTML5, CSS3 (Tailwind), JavaScript (ES6+), React.js, PHP, Node.js
CMS & Platforms: WordPress, Shopify (API/Liquid), Supabase, Figma
Databases & Backend: MySQL, MongoDB
AI Automation: Groq/OpenAI APIs, Agentic Workflows, Prompt Engineering
Tools & Environment: Git/GitHub, Linux/Unix, Postman, Vercel/Render
Languages & Fundamentals: C++, Python, Data Structures, DBMS, Operating Systems

LEADERSHIP & COMMUNITY

- **Web Lead, JNU Placement Cell:** Building the university's recruitment portal and digital workflows.
- **Vice-President, UAV & Drone Club:** Leading 40+ enthusiasts in building autonomous aerial systems.
- **Blockchain Coordinator, GDG JNU:** Organizing technical labs on distributed systems and smart contracts.
- **Vice-President, Bandish (Music Club):** Managing logistics and rehearsals for university cultural fests.

ACHIEVEMENTS

- Certified in **Microsoft Azure AI Fundamentals (AI-900)**, Score: 890/1000. [View Credential]
- Earned **AI Fundamentals: Foundations for Understanding AI** badge from IBM SkillsBuild. [View Badge]
- Solved **200+ Data Structures and Algorithms problems** on LeetCode.
- Cleared internal round of **Smart India Hackathon 2024** and achieved **2nd Position** at EngQuest, JNU's Technical Fest.
